what is post modernism is it a new world view or an outgrowth of the post industrial society is it a shift in philosophy the arts and architecture in this fourth entirely revised edition charles jencks one of the founders of the post modern movement shows it is all these things plus many other forces that have exploded since the early 1960s in a unique analysis using diagrams designed especially for this edition he reveals the evolutionary social and economic forces of this new stage of global civilisation but why has post modern culture arrived in an ironic parable the protestant crusade jencks uncovers some hitherto hidden origins the modernists abhorrence for all things sensuous and natural and their zeal for all things orderly and mechanistic this pseudo religion led in the 1920s to the famous vacuum cleaning period the purgation of values metaphysics and emotion in the 1970s it led on to the protestant inquisition which inadvertently created the very enemy modernists feared post modernism a counter reformation the reassertion of worldliness fecundity humour and pluralism however more than one tradition emerged and jencks distinguishing two types of post modernism deconstructive and reconstructive demonstrates that the former is often a disguised form of late modernism this takes the de creation and nihilism of its parent to extremes the main engine that drives global culture today post modernisation the electronic economy and instant communications network is analysed in its close relation to other posts post fordism post socialism and the post national world of trading blocs and unstable nations jencks argues that this may result in catastrophe and global governance or a web of transnational institutions and obligations the most radical idea of this challenging book is the conclusion the notion that the post modern world does not mean the end of metanarratives but something quite different belief systems are flourishing as never before and jencks argues a new metanarrative based on the story of the universe and its generative qualities will soon create a new world view that will affect all areas it is a story which grows directly out of the post modern sciences of complexity and is thus both true and mythic other what is titles include what is abstraction what is deconstruction

garish churches gabled panel blocks neo historical tenements this book is about these and other architectural oddities that emerged in poland between 1975 and 1989 a period characterised by the decline of the authoritarian socialist regime and waves of political protest during that period committed architects defied repressive politics and persistent shortages and designed houses and churches which adapted eclectic historical forms and geometric volumes and were based on traditional typologies these buildings show a very different background of postmodernism far removed from the debates over robert venturi philip johnson or prince charles in western europe and north america a context in which postmodern architecture stood not for world weary irony in an economically saturated society but for individualised counter propositions to a collectivist ideology for a yearning for truth and spiritual values and for a discourse on distinctiveness and national identity postmodern architecture in socialist poland argues that this new architecture marked the beginning of socio political transformation and at the same time showed postmodernism s reconciliatory potential in light of massive historical ruptures and wartime destruction these buildings successfully responded to the contradictory desires for historical continuity and acknowledgment of rupture and loss next to international ideas the architects took up domestic traditions such as the ideas of the polish school of historic conservation and long standing national patriotic narratives they thus contributed to the creation of a built environment and intellectual climate that have been influential to date this book will be of great interest to students and scholars interested in postmodern architecture and urban design as well as in the socio cultural background and transformative potential of architecture under socialism
